1. The following is an examiner's statement of reasons for allowance: There is no motivation to remove glycol from the invention of Meucci. Note that antioxidant, presented as an optional component in claim 27 is seen as an non-essential element, and therefore the scope of claim 22 remains clear. With respect to "levels down to at least 0.3 ug/ml" the phrase is interpreted in view of the specification and applicant's arguments as "levels down to 0.3 ug/ml or values greater than 0.3 ug/ml". Note that Bergqvist teaches separate extraction steps following precipitation with zinc sulfate and acetonitrile prior to HPLC and Lam teaches addition of zinc sulfate and solvent as separate steps.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
